## § 155.2

risk because the combined total of 1,000,000 bushels of CBOT Wheat Referenced Contracts sold by Company A and Company B does not exceed the 1,000,000 bushels of wheat that is owned by Company A. The risk exposure for Company A and B results from a potential change in the value of wheat.

### 9. REPURCHASE AGREEMENTS

a. *Fact Pattern:* When Elevator A purchased 500,000 bushels of wheat in April it decided to reduce its price risk by selling the quantity equivalent of 500,000 bushels of CBOT Wheat Referenced Contracts. Because the price of wheat has steadily risen since April, Elevator A has had to make substantial maintenance margin payments. To alleviate its concern about further margin payments, Elevator A decides to enter into a repurchase agreement with Bank B. The repurchase agreement involves two separate contracts: A fixed-price sale from Elevator A to Bank B at today's spot price; and an open-priced purchase agreement that will allow Elevator A to repurchase the wheat from Bank B at the prevailing spot price three months from now. Because Bank B obtains title to the wheat under the fixed-price purchase agreement, it is exposed to price risk should the price of wheat drop. It therefore decides to sell the quantity equivalent of 500,000 bushels of CBOT Wheat Referenced Contracts.

*Analysis:* Bank B's hedging transaction meets the general requirements for bona fide hedging transactions (§§151.5(a)(1)(i)–(iii)) and the specific provisions for owning the cash commodity (§151.5(a)(2)(i)). The sale of Referenced Contracts by Bank B is a substitute for a transaction to be taken at a later time in the physical marketing channel either to Elevator A or to another commercial party. The transaction is economically appropriate to the reduction of risk in the conduct and management of the commercial enterprise of Bank B because the notional quantity of Referenced Contracts sold by Bank B is not larger than the quantity of cash wheat purchased by Bank B. Finally, the purchase of CBOT Wheat Referenced Contracts reduces the risk associated with owning cash wheat.

### 10. INVENTORY

a. *Fact Pattern:* Copper Wire Fabricator A is concerned about possible reductions in the price of copper. Currently it is November and it owns inventory of 100,000 pounds of copper and 50,000 pounds of finished copper wire. Currently, deferred futures prices are lower than the nearby futures price. Copper Wire Fabricator A expects to sell 150,000 pounds of finished copper wire in February. To reduce its price risk, Copper Wire Fabricator A sells 150,000 pounds of February COMEX Copper Referenced Contracts.

*Analysis:* The Copper Wire Fabricator A's hedging transaction meets the general requirements for bona fide hedging transactions (§§151.5(a)(1)(i)–(iii)) and the provisions for owning a commodity (§151.5(a)(2)(i)(A)). The sale of Referenced Contracts represents a substitute for transactions to be taken at a later time. The transactions are economically appropriate to the reduction of risk in the conduct and management of the commercial enterprise because the price of copper could drop further. The transactions in Referenced Contracts arise from a possible reduction in the value of the inventory that it owns.
